

The ultimate choice for heavy duty applications

Are you looking for one of these ultra strong solutions? Contact us for information or to plan an appointment.

Poly Marine Fender Systems

Poly Marine Fender Systems are the highest quality fender systems in the Industry.

With over 30 years of experience, Poly Marine has utilized its knowledge of polymer technology for the offshore oil and gas industry to manufacture the best-in-class vessel and quayside fender systems, for the marine industry.

Our fender systems are ultra strong, they are specially designed for heavy duty operations and therefore extremely durable. They have a unique high buoyancy (up to 80% more) and very high energy absorbing power.

Our fender systems can be produced in several colours and are suitable for vessels such as Crew tenders, Pilot vessels, Wind farm support and Heavy Duty Workboats. We are also providing specials such as: Pontoons, Floating Mooring Buoys, Bollard- and Rope Protection Solutions.

- » Ultra strong fender systems of the highest quality
- » Collision resistance and extremely durable
- » Very high buoyancy
- » Optimal resilience

Ultra strong fender systems for heavy duty applications

Part of the Fender Innovations Group

- » **Ultra strong** fender systems for heavy duty industry - proven in the harshest environments
- » The **highest quality** - Manufacturing process that complies with the highest offshore specifications which ensures quality and a perfect performance of our products
- » Unique production process ensures that our fenders are both **optimally resilient**, durable and have an excellent wear resistance

- » **Simple mounting system**- partial replacement options
- » **Excellent wear resistance**
- » **Low coefficient of friction**- energy absorbing power
